

Electric Vehicle Charging Point Installers

This regulated qualification is for those wishing to achieve a nationally recognised qualification in the Installation and Commissioning of Electric Vehicle Charging Equipment in Domestic, Commercial and Industrial locations. The qualification has been designed in conjunction with the latest IET Code of Practice.

This qualification has been updated to BS7671:2018 Amendment 2 (2022) and current industry requirements.

The objective of this course is for delegates to demonstrate and understand the requirements of designing and installing EV charging points safely within Domestic and Commercial situations.

Course cost: £405

You will study over 12 hours (2 days) + Assessments.

- [Sector Overview](#)

The Electrical Sector is on the rise around the world and in the UK. Its strong links to a sustainable future have increased the variety and quantity of jobs on offer.

A skills shortage in the UK means over 50% of advertised vacancies within Electrical Installation are not being filled. This makes now the ideal time to get skilled and enter a career where the number of job opportunities is increasing.

Typical tasks for electricians can include, installing lighting and power systems, including maintenance on domestic and commercial premises. New housing developments, increases in infrastructure and new government policy means there are lots of opportunities related to sustainability such as solar panel systems and the UK's electric vehicle network. Our courses will prepare you for these challenges.

- [Entry Requirements](#)

The entry requirements for this course are:

- This qualification is aimed at electricians working within domestic and/or non-domestic premises and they shall hold as a minimum;
- Level 3 Award in the Requirements for Electrical Installations BS7671 (current edition) and
