

Engineering Level 2

This is the second year of a 2 year course after which you have the option of progressing into employment or progressing to university.

This course is designed for ages 16-19 and 19+ adults.

Our engineering course is designed to provide you with the knowledge and skills to access the Engineering Industry. Once you have completed your hands-on engineering training, you will be industry ready.

Throughout the course you will be trained and assessed to achieve an EAL qualification. You will also receive training which reflects the reality of the industry and will provide you with a comprehensive understanding of the skills and knowledge required to progress your career.

The course is scheduled over 3 days per week and will be a mixture of theory and practical across the 2 years.

Progression opportunities

Your progression from this qualification will be either of the below pathways:

- Employment – This qualification will give you the skills required to gain employment.
- University – This course will allow you to apply for specialist fields within the university setting.

Entry Requirements

The entry requirements for this course are:

- Level 2 (Year 2) – must have achieved both GCSEs to at least grade 4 in English and maths. A science GCSE is also preferred. You must also have completed the Level 1 (Year 1) qualification.

If required, you will have the opportunity to study GCSE maths and/or English alongside your course so you can progress onto the next level.

What will I study?

Over the two years (Level 1 and 2) you will be cover a range of topics across the following areas:

Disclaimer:

Every effort has been made to ensure the details contained in this leaflet are up-to-date and accurate at the time of printing. However, the College reserves the right to alter or cancel courses, their content, entry requirements, fees or other details should circumstances dictate.

- Working safely in an engineering environment
- Carry out engineering activities efficiently and effectively
- Using and communicating technical information
- Carry out routine servicing of mechanical equipment
- Carry out routine servicing of electrical and electronic equipment
- Maintaining and using mechanical devices and equipment such as lathes and mills
- Maintaining electrical equipment/systems
- General maintenance
- Engineering applications
- Design using Computer Aided Design (CAD) software
- Engineering principles
- Engineering product design and manufacture
- CAD in Engineering
- Additive manufacturing processes

This course is supported by our Create Your Future Programme. An online curriculum, specially tailored to your course and level, to help you develop essential workplace skills, strengthen your independence, boost confidence and increase progression opportunities.

How will I be assessed?

You will be assessed using a mix of theory and practical assessments which will be carried out to industry standards.

The assessment methods will be a mix of the below:

- Practical assessments
- Theory based assessments
- Online exams

All assessments will give you an opportunity to pass at one of the following three standards:

- Pass
- Merit
- Distinction
